

FRANCISCO MUÑOZ IRLES, C.B.

FLEXOMETER MODEL 5021

DESCRIPTION

Equipment for determining the flex resistance of penetration resistant inserts.

TECHNICAL CHARACTERISTICS

- In accordance with Standard According to the Standards: EN ISO 20344 (5.12) and ISO 22568-3.
- 4 Test positions.
- Flexion speed: 16 ± 1 Hz.
- Flexing displacement of 33 mm.
- Preselecting programmable digital cycle meter with 6 digits.
- Automatic stop on having fulfilled the programmed cycles.
- Protection screens in the flexing area.
- Protection equipment in accordance with the security directive for machines "EC".
- Operation tension 24 V.
- Working voltage 220V 50/60 Hz.
