

FRANCISCO MUÑOZ IRLES, C.B.

CHAMBER FOR MEASURING THE BOND STRENGTH UNDER SPECIFIC CONDITIONS ("CREEP TEST") MODEL 5038

DESCRIPTION

Chamber to make the peel test under constant load and constant high temperature ("Creep Test").

TECHNICAL CHARACTERISTICS

- In accordance with Standard: EN 1392:2007.
- 9 Test positions.
- Total load of 0.5, 1.0, 1.5, 2.0 and 2.5 kg.
- Temperature range from 40°C to 100°C $\pm$ 2°C.
- Temperature control system by digital thermoregulator.
- Thermometer of graduated rod inside the chamber.
- Light at the glass door.
- Working voltage 220 V 50/60 Hz.
