MECHANIC JAWS FOR MAKING TESTS IN DYNAMOMETER MODEL 53064

DESCRIPTION

Jaws form the interface between a test specimen and the testing machine. They must hold the specimen with sufficient force to prevent slippage, whilst not damaging it.

TECHNICAL CHARACTERISTICS

- Load capacity 2 kN.
- Manual operated.
- Made of aluminium alloy.
- Quick system for changing the jaws.
- The jaws lines up in order to be adapted to different materials making easy the work.
- Support for grips with different dimensions.
- Available jaws with different textures of the gripping surface in order to test different materials.
- Grips made of treated steel.
